Experience

Software & Automation Developer · Praeco

Jan 27, 2026 – Oct 9, 2026

- Built front-end and back-end features that connected user interfaces to data and business logic.
 - Developed Salesforce automations and n8n workflows that connected business tools and automated recurring tasks.
 - Configured and managed Supabase databases; wrote SQL for applications and automated workflows.
 - Built web scrapers and AI extraction workflows, including autonomous AI scrapers, that converted website content into structured data.
 - Configured self-hosted LLMs for prototyping and AI automation; served quantized models with vLLM.
 - Deployed and maintained self-hosted applications and open-source CRMs on virtual private servers (VPS) connected through Tailscale.
-

Developer · Graceful Prosperity

Apr 28, 2025 – Jan 26, 2026

- Configured GoHighLevel (GHL) and built workflow automations.
 - Configured additional CRM systems and automated their workflows.
 - Built telephony integrations with Twilio.
 - Built internal tools and workflow automations that connected Google Apps Script, Zapier, and GoHighLevel (GHL).
 - Developed and operated services on Linux virtual machines.
 - Managed company networking with Tailscale private networks and exit nodes; published services through Tailscale Funnel.
 - Configured domains and DNS for company systems; administered tools and accounts.
-

Automation & Integrations Specialist · Fundflare

Dec 14, 2023 – Apr 26, 2025

- Automated document generation, approvals, and e-signatures with PandaDoc.
 - Built and maintained Zapier and n8n workflows that connected Google Workspace, Monday.com, Notion, PandaDoc, and custom REST APIs.
 - Built reporting and quality assurance (QA) tools and lightweight internal applications with Google Apps Script and Google Sheets; connected them to Zapier workflows.
 - Integrated Slack commands, events, and webhooks; used Python and SQLite for ETL and reporting; documented workflows and standard operating procedures (SOPs) in Notion.
 - Administered Google Workspace, provided remote team support, and ran internal utilities on Linux using Docker.
-

Project Web Developer / Automations · VA LWIS Digital

Apr 2023 – Sep 2023

- Updated client websites using HTML, CSS, and JavaScript; fixed defects across client pages.
- Built Zapier workflows for intake, notifications, and handoffs across forms, spreadsheets, and CRM tools.

Onboarding Team Lead / Tech Support · MIR Partners Inc

Mar 2021 – Dec 2022

- Triage support tickets, prioritized incidents, and maintained response SLAs.
- Provided remote support, maintained a searchable FAQ of fixes, and handled risk escalations and customer data securely.

Earlier experience: Provided customer and technical support at Chime, Cash App, and The Office Gurus (2019–2020).

Skills

Automation and integrations: n8n; Zapier; GoHighLevel (GHL) workflows; Salesforce automations; Google Apps Script; REST APIs; webhooks; Twilio; Slack API (commands, events, webhooks); PandaDoc (document generation, approvals, e-signatures)

CRM and business platforms: GoHighLevel (GHL); Salesforce; self-hosted open-source CRMs; Monday.com; Notion; Google Workspace administration; Google Sheets

Development: JavaScript; Python; HTML; CSS; front-end and back-end development; internal tools; web scraping; application and workflow debugging

Data: Supabase; SQL; SQLite; ETL (extract, transform, load); data cleaning; reporting

Infrastructure and networking: Linux; virtual machines; Docker; VPS administration; Tailscale (private networks, Funnel, exit nodes); domain and DNS configuration; self-hosted applications

AI: Local LLM development, fine-tuning, and serving on a personal MSI EdgeXpert (NVIDIA DGX Spark platform), with vLLM for quantized model serving; autonomous AI scrapers; Ollama; Hugging Face; AI data extraction; text extraction and summarization; AI-assisted development (Claude Code, Codex, Antigravity)

Support and operations: Ticket triage and service-level agreements (SLAs); remote support (RustDesk, TeamViewer); user onboarding; documentation and standard operating procedures (SOPs) in Notion

Training & Education

Machine Learning / AI Engineer Career Path · Codecademy · Certificate of completion · Oct 2025

Also completed (Codecademy): OpenAI API Coding with Python · Build Chatbots with Python · Learn Prompt Engineering · Defending Against AI-Gen Attacks · Learn Python 3 · Learn Node.js · Intro to Cloud Computing · Introduction to Project Management

Education: High school diploma, Liceo Prof. Luis Alonso Pino, 2008–2010 · Computer maintenance certificate, 2008–2010

Languages: English · Spanish
